

Social license request form Cyclos 4 PRO

Non-profit organisations and companies with a social mission (e.g. philanthropy projects, environmental innovations) can apply for a social license. Our general policy is that we want to support these organisations in their mission. However, if they have enough resources to pay their fair share, we will ask them to contribute. The above mentioned organisations can apply with this form for a social license, only if they have the proper documents to prove that they are a charitable organisation (see below question #1). Organisations who do not have these documents should first start using the free Cyclos 4 PRO version and can only apply for a social license, if they have a running Cyclos 4 PRO system with more than 200 users .
